

Applications will not be accepted and permits will not be granted without applicant's signature below.

The City has the right to prescribe the method to be used, the width of the curb cut and any other reasonable conditions for the protection of the public, utilities and for minimizing interference with vehicular or pedestrian traffic.

City standard specifications or, if applicable, Colorado Department of Transportation standards must be met.

By posting of bond, the contractor warrants the work will be done in accordance with applicable specifications and guarantees the work for a period of two (2) years.

Any construction activity which obstructs--even temporarily--any portion of sidewalks, streets, curb and gutters within Idaho Springs must be approved.

When any portion of a street or sidewalk is to be blocked, proper barricades must be installed and a safe passageway provided. This may include construction of a covered walkway to maintain safe pedestrian access. Contractor must provide traffic control.

Drainage, water and sewer must be protected by contractor.

All work must be approved and inspected by the Public Works Director or his designee.

24 hours advance notice is required for inspections. City working hours are 6 a.m. to 2:30 p.m. Inspections will not be scheduled after hours or on weekends.

Neither the construction nor the use of the completed curb cut may unreasonably interfere with traffic, parking needs or access to adjacent properties.

I have read, understand and agree to the above.
